(54) Title: OPTICAL DISC PLAYER AND THE PLAYING METHOD

(57) Abstract: An optical disc player includes a detecting module and a creating module. The detecting module is used to detect whether to meet a branch point or an interruption point or a pause point; and the creating module is used to create a corresponding bookmark as a navigation for the subsequent broadcast to record the relevant information of a branch point or an interruption point or a pause point when meeting the branch point or the interruption point or the pause point. The playing method of the player includes: detecting whether to meet a branch point or an interruption point or a pause point, creating a corresponding bookmark as a navigation for the subsequent broadcast to record the relevant information of the branch point or the interruption point or the pause point when to meet the branch point or the interruption point or the pause point.
